SAP BUSINESS OBJECT COURSE CONTENT

SAP Business Objects 4.0 Training Course

This course will cover following Topics

- SAP Business Objects Universe Designer
- SAP Business Objects Web Intelligence

SAP Business Objects Universe Designer

- **Understanding Business Objects Universes**
 - Business Objects universe concepts
 - Understanding universe development cycle
- **Creating the Basic Universe**
 - Getting started to create the universe
- **Building the Universe Structure**
 - Create the universe structure
 - Defining joins in a universe
- **Dimension Objects**
 - Understand classes and objects
 - Creating classes and objects
- **Measure Objects**
 - Measure object concepts
 - Creating measure objects
- **Loops in a Universe**
 - Understanding loops concept
 - Resolving loops using aliases
 - Resolving loops using contexts
- **Understanding and Resolving SQL Traps**
 - Understanding SQL traps and universes
 - Detecting and resolving chasm traps
 - Detecting and resolving fan traps
- **Applying Restrictions on Objects**
 - Restricting the data returned by objects
- **Using @functions with Objects**
 - Defining @functions
 - @prompt
 - @prompt syntax
 - @select
 - @where
 - @aggregate_aware

SAP Real Time Training With Excellence and commitment

- **Hierarchies**
 - Hierarchies and universes concept
 - Working with hierarchies
- **Lists of Values**
 - Creating a list of values
 - Working with LOVs in Universe Designer
 - Creating a cascading LOV
- **Derived Tables and Indexes**
 - Derived tables concept and its use
 - Applying index awareness
- **Linking Universes**
 - Linked universe concept
 - Creating links between universes
- **Universe Access Restrictions**
 - Setting access restrictions on a universe
- **Universe Management**
 - Documenting universes
 - Deploying universes
 - Maintaining universes
- **Web Intelligence Intro**
 - Web Intelligence concepts
- **Creating Web Intelligence Documents with Queries**
 - Creating a new report
 - Editing Report query
 - Understanding query properties
- **Restricting Data Returned by a Query**
 - Restricting data with query filters
 - Predefined query filter
 - Single-value query filter
 - wildcards in query filters
 - prompts
 - complex filters
- **Designing Web Intelligence Reports**
 - Working with Web Intelligence documents
 - Displaying data in tables and charts
 - Creating tables
 - Working with tables
 - Presenting data in free-standing cells
 - Presenting data in charts
- **Various features of WebI in Reports**

SAP Real Time Training With Excellence and commitment

- Breaks, calculations
- Sorts
- Formatting breaks and cross tabs
- Report filters
- Ranking data to see top or bottom values
- Tracking data changes
- Using alerters to highlight information
- Organizing a report into sections
- Copying data to other applications
- **Formatting Reports**
 - Formatting documents
 - Formatting charts
- **Calculating Data with Formulas and Variables**
 - Explaining formulas and variables
 - Using formulas and variables
- **Using Multiple Data Sources**
 - Synchronizing data from multiple data sources
 - Creating multiple queries in a document
 - Synchronizing data with merged dimensions
 - Using a personal data provider
- **Analyzing Data**
 - Analyzing the data cube
 - Drilling in Web Intelligence documents
 - Setting Web Intelligence drill options
- **Managing and Sharing Web Intelligence Documents**
 - Exporting documents to the CMS
 - Managing documents in InfoView
 - Viewing a Web Intelligence document in InfoView
 - Sharing Web Intelligence documents
 - Setting InfoView preferences
 - Web Intelligence report panels
 - scheduling reports

Admin and Security

- Managing User & user groups
- Managing Access levels
- Managing servers
